EXPERIENCE

Enbake Consulting Pvt. Ltd. - Karol Bagh New Delhi
2021 - 2024 Present

- Work on the client side using **React** to create user interfaces. Build components, handle routing, manage state using tools like **Redux** or **Context API**, and ensure that the application is responsive and user-friendly.
- **Express.js** and **Node.js** to build the backend logic of the application. This includes creating APIs, handling HTTP requests and responses, implementing authentication and authorization, and connecting to the **PostgreSQL/MongoDB database**.
- Design and implement **RESTful** or **GraphQL APIs** for communication between the front-end and back-end, enabling data exchange and functionality access.
- Identifying and resolving **issues, bugs, and errors** in the application during development and after deployment.
- Using tools like **Git** for version control and collaborating with others effectively through platforms like **GitHub**.

PROJECTS

- **GetNewHouse.ca :** An all-encompassing Canadian real estate portal, facilitating efficient, cost-effective property information exchange among buyers, sellers, and agents. https://getnewhouse.ca
- **Urbantasker :** A service-based tech platform offering a diverse array of home services Customers can easily book these services online. https://urbantasker.com
- **Simtag :** A cellular-based tracking platform for accurate location tracking of SIM-based devices. https://simtag.logystixs.com
- **Logystixs :** GPS tracking platform that allows you to track the location of GPS-enabled devices. It provides features for real-time tracking, fleet management. https://track.logystixs.com
